DETAILED ACTION

Reason For Allowance

1. Claims 17-25 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 25, which include a first substrate having a first groove and a second substrate having a second groove and therefore forming a movable oscillating member in a first groove of a first substrate and a transparent electrode in a second groove of a second substrate.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yokoyama et al.(US 6,094,294 A) discloses an optical modulator device, display and electronic apparatus in Figure 4 and 7 comprising of a first substrate (item 10d) having a movable reflective film (item 15d) that oscillates in accordance with the application of an

electrostatic force; a light-transmitting second substrate (item 20) disposed so as to oppose the first substrate (10d) and formed with a transparent electrode (item 27) for applying the electrostatic force, in a position corresponding to the movable reflective film (15d); however, Yokoyama et al. a first substrate having a first groove and a second substrate having a second groove and therefore forming a movable oscillating member in a first groove of a first substrate and a transparent electrode in a second groove of a second substrate.
